

PRESS RELEASE

Public Interest Public Safety

On August 10th and 11th, EOD Bomb Robot Technicians from all over the country will gather at FNT, Fiber Network Training Services to learn the latest techniques in emergency fiber optic restoration in hazardous situations.

FNT, an Arizona Private Postsecondary Licensed provider of fiber optic training has teamed with The Phoenix Police Department, who actively participates in this quarterly event, to share in the knowledge of the tools needed to help save lives.

Protecting the public with state-of-the-art robotic technology has become a necessity in wake of the terrorist acts of the past and threats of the present. FNT, Arizona DPS, and many other Arizona EOD Units have been working together for several years now to help keep Arizona streets and highways safe.

FNT provides complimentary services to keep the fiber optics on State and Community robots in tip-top order and in return, these EOD units support the training efforts of FNT to spread the word throughout the country that fiber optics are easy to understand and work with, even in difficult situations.

July and August of 2007 will bring EOD Technicians from all over the world to Phoenix for the International Association of Bomb Technicians and Investigators 35th Annual In-service training conference and exhibition, where FNT will be presenting workshops on fiber optic technology for the public safety robotic industry.

All Press Agents will be welcome to attend on Friday, August 11th between the hours of 1:30 and 2:30 PM. We expect the New Phoenix P.D. Bomb Squad fully Integrated EOD Dispatch Truck to be at FNT. A workshop on emergency fiber optic repair should make for some interesting photo opportunities.

Training Center Location:
FNT, Fiber Network Training and Consulting Services
3908 East Broadway #100
Phoenix, Arizona 85040
Contact: April Noriega
